

June Business Insights and Revenue Protection Report

Controller-level analysis of sales, VAT, payment allocation, discounts, KOT events, turnaround and operating patterns.

FULFILLED REVENUE AED 108,172.75 1,816 supplied invoices	OUTPUT VAT AED 5,124.92 Invoice ledger control	TOTAL REDUCTIONS AED 10,474.25 Discounts + Complimentary	AVERAGE TURNAROUND 36 min 1,223 orders timed	PAYMENT ALLOCATION GAP AED 1,181.90 Reporting gap, not lost revenue
---	---	---	---	--

Executive highlights

Control	June result	Controller interpretation
Best revenue date	2026-06-12 - AED 5,405.90	Protect stock and labor on comparable demand days.
Highest order volume	2026-06-25 - 75 orders	Check capacity, queue time and average check together.
Peak revenue hour	02 PM - AED 12,518.10	Align kitchen, cashier and aggregator availability.
Strongest complete week	22 Jun-28 Jun - AED 28,685.65	Use as the operational benchmark week.
Fastest channel	Pickup - 22 min average	Preserve process; compare prep and queue components.
Slowest channel	Delivery - 90 min average	Split kitchen, dispatch wait and driver travel timestamps.

Primary conclusion

June fulfilled sales and invoice VAT reconcile. The main business-protection priorities are delivery speed, discount governance, cancellation reason quality, missing aggregator lifecycle timestamps and incomplete split-payment allocation in tax-payment exports.

Standardized sales bridge and vocabulary

Every dashboard, table, Excel export and PDF must use these names and this processing order. VAT is disclosed as the tax included in taxable sales; it is not deducted again when calculating Actual Sales incl. VAT.

Step	Standard title	June amount	Definition / treatment
1	Gross Item Sales	AED 118,066.00	Quantity x transaction-time item price before reductions.
2	Less: Discounts	AED 10,461.25	Order and promotional reductions. Excludes complimentary items.
3	Less: Complimentary	AED 13.00	Authorized free item with item title, reason, actor and approval. June: Fattoush on bill #2990.
4	Net Item Sales incl. VAT	AED 107,591.75	Gross Item Sales - Discounts - Complimentary.
5	VAT included	AED 5,124.92	Output VAT contained within taxable item/charge sales; disclosure and filing control.
6	Net Item Sales excl. VAT	AED 102,466.83	Net Item Sales incl. VAT - item VAT.
7	Plus: Charges incl. VAT	AED 581.00	Separately classified delivery/service/packaging/other charges, including any applicable VAT.
8	Actual Sales incl. VAT	AED 108,172.75	Net Item Sales incl. VAT + Charges incl. VAT; customer/invoice total.

Complimentary control

AED 13.00 Fattoush on bill #2990 is titled only as Complimentary. It may appear under the broader Total Reductions control, but must not be relabeled as Item Discount. Its reason, user, timestamp and approval evidence remain attached, and it is excluded from the eligible base for the separate 10% order discount.

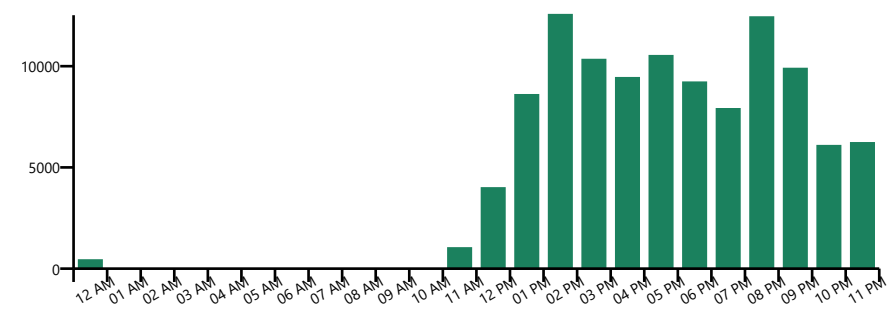

Mandatory reconciliation

Gross Item Sales - Discounts - Complimentary = Net Item Sales incl. VAT. Net Item Sales incl. VAT + Charges incl. VAT = Actual Sales incl. VAT. Net Item Sales excl. VAT + item VAT = Net Item Sales incl. VAT. Charge VAT must be disclosed separately when applicable.

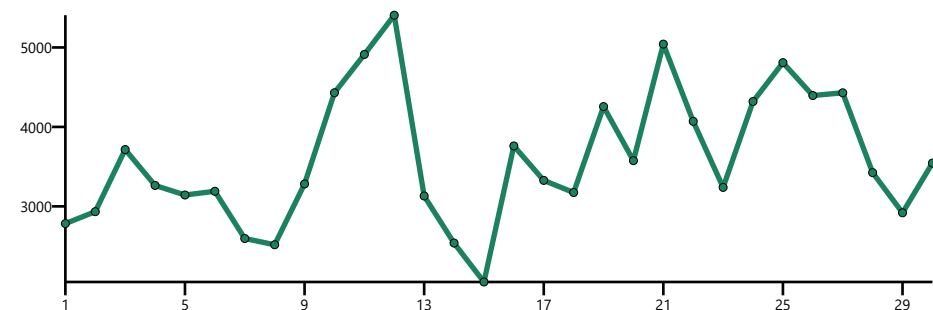

Revenue patterns

Revenue performance is shown below. It must not be described as accounting profitability until item cost, packaging, commission and labor allocation exist.

Hourly revenue

Daily revenue - June 1 to 30

Weekday performance

Day	Observed days	Orders	Average daily revenue	Average check
Monday	5	269	AED 2,867.48	AED 53.30
Tuesday	5	322	AED 3,351.94	AED 52.05
Wednesday	4	278	AED 3,947.90	AED 56.80
Thursday	4	262	AED 4,039.57	AED 61.67
Friday	4	257	AED 4,299.92	AED 66.92
Saturday	4	208	AED 3,581.36	AED 68.87
Sunday	4	220	AED 3,400.15	AED 61.82

Weekly control

Week	Days	Orders	Revenue	Discount	Average check
01 Jun–07 Jun	7	421	AED 21,623.80	AED 2,288.20	AED 51.36
08 Jun–14 Jun	7	416	AED 26,216.40	AED 3,320.60	AED 63.02
15 Jun–21 Jun	7	402	AED 25,183.40	AED 2,291.60	AED 62.65
22 Jun–28 Jun	7	445	AED 28,685.65	AED 2,088.35	AED 64.46
29 Jun–05 Jul	2	132	AED 6,463.50	AED 472.50	AED 48.97

Controller action plan

Priority	Action	Business protection objective
1	Protect Friday and 2 PM capacity	Avoid stock-outs, delayed production and aggregator downtime during the strongest demand windows.
2	Decompose delivery turnaround	Record food-ready, dispatch, driver-assigned and delivered timestamps; manage each delay owner.
3	Review discount title x reason x user weekly	Separate planned promotion, approved service recovery and unauthorized concession.
4	Standardize cancellation cause codes	Classify customer change, duplicate punch, stock-out, kitchen delay and system error.
5	Explode split tenders into allocation rows	Make payment reports reconcile without allowing payments to drive VAT filing.
6	Configure recipes and effective-dated costs	Enable item, hour, weekday and order-type contribution margin instead of revenue-only ranking.
7	Repair guest and lifecycle data capture	Make average-per-person and customer-volume analytics dependable.

Data-quality controls developers should add

Immutable invoice-line ID; original transaction price; item discount; allocated order discount; complimentary authorization; event timestamp; actor and approver; effective-dated menu price; payment-allocation rows; food-ready and dispatch timestamps; charge type and VAT treatment; recipe cost and aggregator commission.

Filing safeguard

Output VAT must be controlled from the fulfilled supply/invoice ledger, adjusted only by valid tax adjustments or credit notes. Payment allocation, settlement status and aggregator remittance are reconciliation dimensions and must not determine the VAT filing base.
